WILLIAM M. TREAT
PRIMARY EXAMINER

Art Unit: 2183

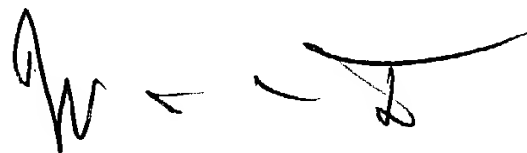

1. The examiner has accepted the drawing changes submitted on 5/3/2004.
2. The examiner has treated applicants' petition of 5/3/2004 as a request for reconsideration of his objection to the drawings. Based on the Board's ability to render a decision on the patentability of the claims using applicants' drawings and applicants' submission, the examiner has decided to withdraw his objections to the drawings.
3. The following is an examiner's statement of reasons for allowance: Based on the Board's conclusions (1) that applicants' insistence that the term, instruction, in his claim language can mean both a multi-operation instruction and single operation instruction introduces no indefiniteness into his claim language, (2) that the examiner's simple loop program using instructions set forth in the Holman patent represented neither an inherent ability of Holman's system nor something known to one of ordinary skill in the art but, instead, required hindsight to construct, and (3) that the 112, 1st rejection of independent claim 1 and its dependents can be overcome by interpreting applicants' language in claim 1 as requiring the worst case value for the different periods be used or some greater value, the examiner has decided that claim 1 and its dependent claims are allowable over the prior art of record. Based on the Board's conclusions (1) that applicants' insistence that the term, instruction, in his claim language can mean both a multi-operation instruction and single operation instruction introduces no indefiniteness into his claim language and (2) that the examiner's simple loop program using instructions set forth in the Holman patent represented neither an inherent ability of Holman's system nor something known to one of ordinary skill in the art but, instead, required hindsight to construct, the examiner has decided that independent claims 14 and 21 and their respective dependents are allowable over the prior art of record.
